

Board Skills

Israel

A key focal point for shareholders when assessing corporate governance at investee companies is board composition. While discussion of board composition often focuses on gender diversity, the increasingly circumspect investing environment means the investor gaze is adjusting in order to better assess board diversity in the broadest sense. It has become a mainstream belief that having an appropriate mix of certain attributes on the board — in particular skills, experience, diversity, and independence — is essential to ensure that the board as a whole can satisfactorily perform its oversight duty, have informed opinions on all topics relevant to the company and effectively advise management on important strategic decisions. Further, and in addition to the increasing legal requirements for directors in most markets, investors' expectations of boards have never been higher, with their role having evolved from primarily one of watchdog to strategic leadership.

Traditionally, directors' biographies have read like an abridged C.V.; comprising a list of past appointments, with an emphasis on board-level experience both past and present. Recently, however, we have seen a marked increase in the number of companies that are conveying the skill sets of their directors in terms of their relevance to company strategy and the board's operations, rather than simply listing past board positions. Moreover, companies are providing enhanced disclosure regarding board evaluations, succession and nomination processes, along with the everyday workings of the board.

Glass Lewis believes that a board skills matrix can be a valuable tool for assessing a board's mix of skills and experience. Additionally, board skills matrices can help guide the director nomination and succession planning processes. In both cases, we believe disclosure of such is meaningful to shareholders. As such, we believe companies should disclose sufficient information to allow a meaningful assessment of a board's skills and competencies. If a board has failed to address material concerns regarding the mix of skills and experience of the non-executive element of the board, we will consider recommending voting against the chair of the nominations committee or equivalent (e.g., board chair).

*Our analyses of director elections at **TA-35 companies, and companies where more candidates are proposed than available board seats**, may include board skills matrices in order to assist in assessing a board's competencies and identifying any potential skills gaps.*

Companies have been categorised across five broad sectors: Financial, Industrial, Consumer, Pharmaceutical and Healthcare and Resources. Further, each skills matrix will comprise of four "core" skills: Core Industry, Financial/Audit & Risk, Legal/Public Policy and Senior Executive, and sector specific skills from the following list: Cybersecurity/IT, Environmental & Social, Health & Safety, International Markets, M&A/Capital Markets, Technical/Engineering, Manufacturing/Supply Chain, Communications/Marketing/Customer Service. A description of the criteria used to appraise director skills can be found overleaf.

Appendix 1 Board Skills Matrices to be Applied by Glass Lewis

CONSUMER

(Retail/IT/Telecom/Utilities)

Core Industry
 Financial/Audit & Risk
 Legal/Public Policy
 Senior Executive
 Cybersecurity/IT
